European BIBFRAME Workshop 2017

German National Library – 26+27 September 2017

Leif Andresen

Royal Danish Library

2017 European BIBFRAME Workshop

Initiative by The *Nordic Network Group on bibliographic and infrastructure topics (NNG)*

The workshop aim:

- forum for dialogue between representatives from library community in Europe about implementation of BIBFRAME
- forum for sharing knowledge and experience between European libraries
- forum for dialogue between Library of Congress and representatives from library community in Europe.

Introduction

- Over the last years, there have been several Linked Open Data projects in libraries.

- The library community needs one international standard for interchange of bibliographic metadata based on modern technology.

- BIBFRAME shall - according to the intentions of the Library of Congress - replace MARC.

- BIBFRAME has the potential to become more global than MARC21.

- It is important to prepare the implementation of BIBFRAME in Europe. Some countries have taken the lead and other countries are more awaiting. In any case: we need more visibility of BIBFRAME and to start a process making BIBFRAME more international.

Organzation behind

Organizer Group:
- Anna Berggren and Miriam Säfström, National Library of Sweden
- Nina Hyvönen, National Library of Finland
- Leif Andresen, Royal Danish Library
- Reinhold Heuvelmann, German National Library
