Christian Aliverti

Swiss National Library

BIBFRAME Workshop | 23 September 2020

Christian Aliverti

- Librarian, Swiss National Library
- Head of the Section of Bibliographic Access (Cataloguing, Subject Indexing and the Bibliography on Swiss History).
- In charge of the cataloguing principles of the Swiss National Library.
- IFLA Cataloguing Section, EURIG Editorial Committee, Committee for Library Standards for the German speaking countries (Standardisierungsausschuss).
- Lecturer at the University of Zurich.

Christian Aliverti

- Not a representative of RDA bodies (Steering Committee etc.)
- «Only» a RDA user
- With a critical view, but a positive approach to RDA

Why RDA?

- Internationalization
- Data model IFLA LRM
- RDA as a framework for various types of collections:
digital/printed; pictures; books etc.
- Cost savings as a result of cooperation?

My questions about BIBFRAME

- A way to store RDA records in the database?
 - A way to publish the metadata/the catalogue on the internet?
 - A way to link the catalogue's metadata with other metadata?
-
- Is there an approved BIBFRAME standard?
 - And if so: Who approves BIBFRAME?
