What is the best part of BFWE?
115 responses

sharing experiencies
overview current state
infrastructure talks   informal discussions
active participation   recording in progress
chocolate   issues   experiences   interesting   bibframe
exchange
informative   international   conversation
beer   live streamed
informative presentations
socialization   hands on   metadata   data   collaboration
inernational   shared   connections   high-level   inspiration
hybrid   sameas   topics   solutions   community   continuity   powerful   openness   people
ils system   networking   timeliness   chat   sharing
learning   mingling   ideas   practical   discussions   perspective   works in progress
coffee   future   connection   hybrid format   frank   web
nexworking   recorded sessions   sharing experiences   news   virtual access
getting new ideas   well organized   expertise   learned what is going on
hearing different views   forward-looking   data modeling
engage with colleagues   access   heterogeneous
making new friends   hybrid conference   implementation
a lot of discussion   finding similarities
from theory to practice
presentations

What are the most interesting challenges the adoption of BIBFRAME is facing?
81 responses

Which aspects should be considered to release the potential of a BIBFRAME based environment to give greater visibility to resources in languages different than English?

Which is the best message concise to deliver to the higher administration level of an institution concerning the advantages of moving toward a linked open data environment?

How different will BIBFRAME and (especially) the use of BIBFRAME be in five years?

Can Hub (from LC) and Opus (from SVDE) co-exist in harmony?

How long is the shadow of MARC? Is BIBFRAME being shackled by the ghost of MARC?

How should training phases be defined, involving library departments to support the progressive dissemination and understanding the activities involved in the new data life cycles and consumption?

Money for conversion

What to do with MARC!

conversion and interchange

What are the most interesting challenges the adoption of BIBFRAME is facing?
81 responses

Resistance of librarian

multiple BIBFRAME based models and their interoperability

To convince the libraruan community

Getting priority from the management

RDA

Learning new way of thinking about cataloguing / creating descriptive metadata

adapting the models into the the library system interface and data structure

Who pays for what? Access, hosting, exciting, ...

RDA

What are the most interesting challenges the adoption of BIBFRAME is facing?

81 responses

ILS

National implementation

Unity and stop doing flavors

Interoperability with other metadata in a collaborative environment where other data producers are not using BIBFRAME

How will catalogers be trained in 2030 vs today? Will catalogers still exist?

the human perspective - buy-in from cataloguers

Learning

Multilinguality - you should be able to enter data in an interface with your "own" language

The truly shared cataloguing, not everybody has to make its own Works, Agents, etc. - how will we accomplish this?

What are the most interesting challenges the adoption of BIBFRAME is facing?
81 responses

Moving our legacy data there. Who will model our data into works?

Still maintaining MARC and do not know when to switch to BIBFRAME

How to teach, what to teach in order to give a broad and useful knowledge on BIBFRAME and LD technologies and practicalities?

Will BIBFRAME be updated to align with IFLA LRM?

Explaining why we need so much money for it

How can we as non-pioneering university libraries best decide between different BIBFRAME formats and editors?

Looking forward to: cataloging tools out of the box that are user friendly

incentives

changing the mindset of librarians to think beyond MARC

What are the most interesting challenges the adoption of BIBFRAME is facing?

81 responses

Technical performance	multilinguality!	Alligning rda with bibframe
resources	let non-cataloger staffs understand why the adoption is necessary	Education gap between library schools and the workplace
Will there be enough coffee?	Defining a shared environment for collaborative cataloging	Three levels of BIBFRAME vs. four levels of RDA.

What are the most interesting challenges the adoption of BIBFRAME is facing?

81 responses

Difficult to know where to start

The training of the catalogers

Reconciling different versions of BIBFRAME

Legacy data

Why are so many Bibframe extension data models that are used by the different initiatives? eg. SVDE, Folio, Oclc, exLibris.

Interoperability between several BIBFRAME based models

Having to think about conversion back to MARC

User friendly

Explainign the new model without yet being able to show the benefits

4 39

What are the most interesting challenges the adoption of BIBFRAME is facing?
81 responses

Lack of tools/infrastructures that support the entire lifecycle of metadata creation, use and reuse.

True WEMI-model

development of good-enough policies

Uncertainty around BIBFRAME and RDA entity definitions

Engage with BIBFRAME not only as a standard, but to define the conceptual model upon which future extension and maintenance of the standard can be based.

Cleaning up the legacy records

vendors trying to "bolt on" linked data to existing systems that don't support it

Lack of clear vision for what web discovery system changes are needed

Native BF-cataloguing, we want to do it, but there are so little suppliers who offer services to make it possible: hosting of a BF-editor, custom development, etc.

Getting the MARC community to schedule

language, spanish please

Proprietary metadata models break down at statement level.

Will Springer, Ebsco, ... offer records (for ebooks etc) in bibframe? If you switch over to bibframe and can only get those records in Marc it means more work to convert those to your system

Getting the MARC community to schedule the start of its own demise

Getting the MARC community to schedule the start of its own demise

Cataloging in BIBFRAME with RDA Official version

Info wants to be free or expensive; how can it be sustainable, supported, of quality, who pays? How?

Should RDA be updated bases on identified best practice from the BIBFRAME community?

4   39

What are the most interesting challenges the adoption of BIBFRAME is facing?
81 responses

changing the community view from metadata (entity) ownership to providing shared metadata

Stopping converting data back to MARC format

following the WEMI model (IFLA LRM) instead of WMI

Bridging BIBFRAME data interoperably to RDA entities and back

Achieving 'unified' approach while so many different BF extensions exist or are in the works

seems every institution, every project, every national library has their "own" BIBFRAME , but eventually, how will the "BIBFRAMEs" integrate ?

Identifying opportunities for new services for users

Keeping it FAIR

Define bf:Hub more coherently, not as a way of reinforcing MARC-based thinking around access points.
